Our Client Services department informed me that you were looking for a Material Safety Data Sheet (MSDS) for the acid-washed containers that NMS Labs provides for collection and transport of samples for metals analysis. We have contacted the supplier of this product and there is no MSDS since the containers do not contain any hazardous chemicals. The acid is used as part of the container cleaning process only and is completely removed by multiple rinses with water. I am attaching a copy of the literature provided by our supplier that indicates the product is cleaned using an established EPA recommended protocol. If you need a copy of the EPA guidelines please advise.

Should you have additional questions please feel free to contact me directly at 215-366-1222 or by email at margaret.beamer@nmslabs.com.

Sincerely yours,

Margaret R. Beamer, MS, MT (ASCP)
