Leishmaniasis (Visceral) Ab, S

Positive

SDL

Reference Value  
Negative

Abn

Results indicate the presence of antibodies to members of the Leishmania donovoni complex, the causative agents of Visceral Leishmaniasis. Results should not be used as the sole criterion for diagnosis or treatment of Visceral Leishmaniasis and should not be used to diagnose other forms of Leishmaniasis. False positive reactions due to malaria infection have been reported.
