Dog Dander Component Reflex, S

Dog Dander, IgE, S

<0.10 kU/L

SDL

Reference Value
<0.70

Class 0 (Negative <0.10)

Reflex testing to specific dog dander component IgE antibodies was not performed due to undetectable total dog dander IgE antibody. Negative IgE results for total dog dander antibody may indicate, but does not completely rule out, a lack of sensitization to potential dog dander allergenic components. Results from dog dander-specific IgE antibody testing must be interpreted in the context of patient's clinical evaluation and history of allergen exposures.
