Lobster IgG	Y165	Tuna IgG	Y165
5.0 mcg/mL		5.0 mcg/mL	
Oyster IgG	Y165	Reference ranges have not been established for food-specific IgG tests. The clinical utility of food-specific IgG tests has not been established. These tests can be used in special clinical situations to select foods for evaluation by diet elimination and challenge in patients who have food-related complaints. It should be recognized that the presence of food-specific IgG alone cannot be taken as evidence of food allergy and only indicates immunologic sensitization by the food allergen in question. This test should only be ordered by physicians who recognize the limitations of the test. *This test was developed and its performance characteristics determined by Eurofins Viracor. It has not been cleared or approved by the U.S. Food and Drug Administration. FLAG Interpretation: A = Abnormal, H = High, L = Low	
5.0 mcg/mL			
Red Snapper IgG	Y165		
5.0 mcg/mL			
Salmon IgG	Y165	Received: 08 Sep 2023 15:00 Reported: 11 Sep 2023 14:18	
5.0 mcg/mL
