Account Information C7028846 DLMP Rochester		Collected 03 Oct 2024 00:00		

Mpx Virus DNA, QL PCR

Patient Race

Black or African American

Y038

clinical sample is evaluated by the presence of human RNase P. If RNase P is Not detected and the target DNA is Not detected then the result is reported as INVALID. These results must be used in conjunction with clinical observations and epidemiological risk factors.

Ethnicity

Not Hispanic or Latino

Y038

Please review the Fact Sheets and FDA authorized labeling available for health care providers and patients using the following websites:

<https://www.questdiagnostics.com/mpox/hcp/pcr/factsheet><https://www.questdiagnostics.com/mpox/patient/pcr/factsheet>

This test has been authorized by the FDA under an Emergency Use Authorization (EUA) for use by authorized laboratories.

Specimen Type

Lesion swab

Due to the current public health emergency, Quest Diagnostics is accepting samples from appropriate clinical sources (swabs of lesions) collected using a wide variety of swabs and viral transport media for mpox testing, which may not have the equivalent ingredients as the media validated by Quest Diagnostics. Not detected test results derived from specimens received in non-validated media, including non-commercially manufactured viral collection kits, should be cautiously evaluated. Extra precautions should be considered such as additional clinical monitoring and collection of an additional specimen if clinically indicated.

Mpx Virus DNA, QL PCR
