Cashew Component Reflex, S

Cashew, IgE, S

<0.10 kU/L

Class 0 (Negative <0.10)
Reflex testing to specific cashew component IgE antibodies were not performed due to undetectable total IgE cashew antibody. Negative IgE results for total cashew antibody may indicate, but does not completely rule out, a lack of sensitization to potential cashew allergenic components. Results from cashew-specific IgE antibody testing must be interpreted in the context of patient's clinical evaluation and history of allergen exposures.
