UPG Decarboxylase, WB

UPG Decarboxylase, WB

MCR

1.26 RU

REFERENCE VALUE

≥1.0 RU (normal)
0.80–0.99 RU (Indeterminate)
<0.80 RU (indicative of PCT type II)

Interpretation (UPGD)

1 MCR

In this sample, erythrocyte uroporphyrinogen decarboxylase (UROD) activity was normal. While this finding rules out type II porphyria cutanea tarda, it does not eliminate the possibility of types I or III in which only hepatic UROD is deficient. If clinically indicated, consider urine porphyrins analysis.

Please contact the Biochemical Genetics consultant or genetic counselor on call (1–800–533–1710) if you have any questions.

ADDITIONAL INFORMATION

High-Performance Liquid Chromatography (HPLC)/Incubation of Lysed Erythrocytes
