Risk Score, if postmenopausal

2.52

In postmenopausal women a ROMA value ≥ 2.99 indicates a high risk of finding epithelial ovarian cancer whereas a ROMA value < 2.99 indicates a low risk of finding epithelial ovarian cancer at surgery.

ADDITIONAL INFORMATION

The testing method is an electrochemiluminescence assay manufactured by Roche Diagnostics Inc. and performed on the Cobas system.

Values obtained with different assay methods or kits may be different and cannot be used interchangeably.

Test results cannot be interpreted as absolute evidence for the presence or absence of malignant disease.
