Order Number SA00119082	Client Order Number SA00119082	Ordering Physician CLIENT, CLIENT	Report Notes	
Account Information C7028846 DLMP Rochester		Collected 31 Mar 2019 11:00		

Homovanillic Acid (HVA), Random, U

13.7 mg/g Cr

1 MCR

Reference Value
<8.0

High

In this sample, the excretion of homovanillic acid was elevated. Although this finding could be secondary to dopamine infusion, this result may be indicative of a catecholamine-secreting tumor. We need clinical information to provide further interpretation.

ADDITIONAL INFORMATION

Liquid Chromatography-Tandem Mass Spectrometry (LC-MS/MS). Values obtained from different assay methods or kits may be different and cannot be used interchangeably. The results cannot be interpreted as absolute evidence for the presence or absence of malignant disease.

Received: 01 Apr 2019 11:58

Reported: 01 Apr 2019 12:08

Laboratory Notes

- 1 This test was developed and its performance characteristics determined by Mayo Clinic in a manner consistent with CLIA requirements. This test has not been cleared or approved by the U.S. Food and Drug Administration.
