

Sesame Seed, IgE, with Reflex to Sesame Seed
Component, IgE, Serum

Patient ID 321	Patient Name IMPLEMENTATION, TEST T	Birth Date 1973-05-01	Sex F	Age 50
Order Number X100457702	Client Order Number X100457702	Ordering Physician TESTING	Report Notes	
Account Information C7028846 DLMP Rochester		Collected 08 Mar 2024 07:00		

Sesame Seed Component Reflex, S

Sesame Seed, IgE, S

<0.10 kU/L

Class 0 (Negative <0.10)

Reflex testing to specific sesame seed component IgE antibodies was not performed due to undetectable total sesame seed IgE antibody. Negative IgE results for total sesame seed antibody may indicate, but does not completely rule out, a lack of sensitization to potential sesame seed allergenic components. Results from total sesame seed-specific IgE antibody testing must be interpreted in the context of patient's clinical evaluation and history of allergen exposures.
