

Drug Abuse Survey with Confirmation, Panel 5, Chain of Custody, Random, Urine

#### Overview

#### **Useful For**

Detecting drug abuse involving amphetamines, cocaine, marijuana, opiates, and phencyclidine

This chain-of-custody test is intended to be used in a setting where the test results can be used definitively to make a diagnosis.

#### **Reflex Tests**

Test Id	Reporting Name	Available Separately	Always Performed
AMPHX	Amphetamines	Yes	No
	Confirmation, CoC, U		
COKEX	Cocaine and metabolite	Yes	No
	Conf, CoC, U		
OPATX	Opiate Confirmation, CoC,	Yes	No
	U		
PCPX	Phencyclidine	Yes	No
	Confirmation, CoC, U		
THCX	Carboxy-THC Confirmation,	Yes	No
	CoC, U		

#### **Additional Tests**

Test Id	Reporting Name	Available Separately	Always Performed
COCH	Chain of Custody	No	Yes
	Processing		
ADLTX	Adulterants Survey, CoC, U	Yes	Yes

## **Testing Algorithm**

Testing begins with immunoassay screen. Positives are confirmed and quantitated by gas chromatography-mass spectrometry (GC-MS) or liquid chromatography-tandem mass spectrometry (LC-MS/MS) at an additional charge.

Adulterants testing will be performed on all chain of custody urine samples as per regulatory requirements.

#### **Method Name**

Immunoassay

### **NY State Available**

Yes

Drug Abuse Survey with Confirmation, Panel 5, Chain of Custody, Random, Urine

### **Specimen**

## **Specimen Type**

Urine

## **Specimen Required**

Container/Tube: Chain-of-Custody Kit (T282) containing the specimen containers, seals, and documentation required

Specimen Volume: 30 mL

**Collection Instructions:** Collect specimen in the container provided, seal, and submit with the associated documentation

to satisfy the legal requirements for chain-of-custody testing.

Additional Information: Submitting less than 30 mL will compromise our ability to perform all necessary testing.

#### **Forms**

- 1. Chain of Custody Request is included in the Chain-of-Custody Kit (T282).
- 2. If not ordering electronically, complete, print, and send a <u>Therapeutics Test Request</u> (T831) with the specimen.

## **Specimen Minimum Volume**

15 mL

### **Reject Due To**

All specimens will be evaluated at Mayo Clinic Laboratories for test suitability.

#### **Specimen Stability Information**

Specimen Type	Temperature	Time	Special Container
Urine	Refrigerated (preferred)	14 days	
	Frozen	14 days	
	Ambient	72 hours	

#### **Clinical & Interpretive**

#### **Clinical Information**

This assay was designed to screen for and confirm by gas chromatography-mass spectrometry (GC-MS) or liquid chromatography-tandem mass spectrometry (LC-MS/MS) the following drugs:

- -Amphetamines
- -Cocaine
- -Opiates
- -Phencyclidine
- -Tetrahydrocannabinol

Drug Abuse Survey with Confirmation, Panel 5, Chain of Custody, Random, Urine

Chain of custody is a record of the disposition of a specimen to document who collected it, who handled it, and who performed the analysis. When a specimen is submitted in this manner, analysis will be performed in such a way that it will withstand regular court scrutiny. Chain of custody is required whenever the results of testing could be used in a court of law. Its purpose is to protect the rights of the individual contributing the specimen by demonstrating that it was under the control of personnel involved with testing the specimen at all times; this control implies that the opportunity for specimen tampering would be limited.

#### **Reference Values**

Negative

Screening cutoff concentrations Amphetamines: 500 ng/mL

Cocaine (benzoylecgonine-cocaine metabolite): 150 ng/mL

Opiates: 300 ng/mL Phencyclidine: 25 ng/mL

Tetrahydrocannabinol carboxylic acid: 50 ng/mL

This report is intended for use in clinical monitoring or management of patients. It is not intended for use in

employment-related testing.

#### **Cautions**

Not intended for use in employment-related testing.

The test does not screen for drug classes other than those listed above. More comprehensive screening is available using DSSX / Drug Screen, Prescription/OTC, Chain of Custody, Serum or PDSUX / Drug Screen, Prescription/OTC, Chain of Custody, Urine.

#### **Performance**

#### **Method Description**

The amphetamines, cocaine, opiates, phencyclidine, and tetrahydrocannabinol metabolite assays are based on the kinetic interaction of microparticles in a solution (KIMS) as measured by changes in light transmission. In the absence of sample drug, soluble drug conjugates bind to antibody-bound microparticles, causing the formation of particle aggregates. As the aggregation reaction proceeds in the absence of sample drug, the absorbance increases. When a urine sample contains the drug in question, this drug competes with the drug derivative conjugate for microparticle-bound antibody. Antibody bound to sample drug is no longer available to promote particle aggregation, and subsequent particle lattice formation is inhibited. The presence of sample drug diminishes the increasing absorbance in proportion to the concentration of drug in the sample. Sample drug content is determined relative to the value obtained for a known cutoff concentration of drug.(Package insert: Roche Amphetamines, Cannabinoids, Cocaine, Opiates, Phencyclidine reagents, Roche Diagnostic

Drug Abuse Survey with Confirmation, Panel 5, Chain of Custody, Random, Urine

Corp, Indianapolis, IN)

#### **PDF Report**

No

## Day(s) Performed

Monday through Saturday

#### **Report Available**

Same day/1 to 2 days

## **Specimen Retention Time**

2 weeks

## **Performing Laboratory Location**

Rochester

#### **Fees & Codes**

#### **Fees**

- Authorized users can sign in to <u>Test Prices</u> for detailed fee information.
- Clients without access to Test Prices can contact <u>Customer Service</u> 24 hours a day, seven days a week.
- Prospective clients should contact their account representative. For assistance, contact <u>Customer Service</u>.

#### **Test Classification**

This test has been cleared, approved, or is exempt by the US Food and Drug Administration and is used per manufacturer's instructions. Performance characteristics were verified by Mayo Clinic in a manner consistent with CLIA requirements.

#### **CPT Code Information**

80307
