

## **Test Definition: NMEM**

Red Blood Cell Membrane Disorders Gene Panel, Next-Generation Sequencing, Varies

Reporting Title: RBC Membrane Sequencing, NGS

Performing Location: Rochester

#### **Ordering Guidance:**

Multiple hematology gene panels are available. For more information see NHHA and Subpanel Comparison Gene List.

Customization of this panel and/or single gene analysis for any gene present on this panel is available. For more information see CGPH / Custom Gene Panel, Hereditary, Next-Generation Sequencing, Varies.

Targeted testing for familial variants (also called site-specific or known variants testing) is available for the genes on this panel. See FMTT / Familial Variant, Targeted Testing, Varies. To obtain more information about this testing option, call 800-533-1710.

#### **Additional Testing Requirements:**

This test is best interpreted in the context of protein studies and peripheral blood findings. Prior to sending this test, Coombs testing should be negative and consider evaluating a peripheral blood smear. This can be provided by ordering RBCME / Red Blood Cell Membrane Evaluation, Blood. Fill out the information sheet and indicate that a next-generation sequencing test was also ordered. Additionally, providing complete blood cell count data and clinical notes will allow more precise interpretation of results.

#### Shipping Instructions:

Specimen preferred to arrive within 96 hours of collection.

## **Necessary Information:**

- 1. Metabolic Hematology Next-Generation Sequencing (NGS) Patient Information is required. Testing may proceed without the patient information; however, the information aids in providing a more thorough interpretation. Ordering providers are strongly encouraged to fill out the form and send with the specimen.
- 2. If form not provided, include the following information with the test request: clinical diagnosis, pertinent clinical history (ie, complete blood cell count results and relevant clinical notes), and differentials based on clinical or morphologic presentation.

#### **Specimen Requirements:**

Specimen Type: Whole blood

Patient Preparation: A previous bone marrow transplant from an allogenic donor will interfere with testing. Call

800-533-1710 for instructions for testing patients who have received a bone marrow transplant.

Container/Tube:

Preferred: Lavender top (EDTA) Acceptable: Yellow top (ACD) Specimen Volume: 3 mL Collection Instructions:

- 1. Invert several times to mix blood.
- 2. Send whole blood specimen in original tube. Do not aliquot.

# **Test Definition: NMEM**

Red Blood Cell Membrane Disorders Gene Panel, Next-Generation Sequencing, Varies

Specimen Stability Information: Ambient (preferred) 4 days/Refrigerated

#### Specimen Minimum Volume:

1 mL

#### Forms:

- 1. Metabolic Hematology Next-Generation Sequencing (NGS) Patient Information (T816) is required.
- 2. New York Clients-Informed consent is required. Document on the request form or electronic order that a copy is on file. The following documents are available:
- -Informed Consent for Genetic Testing (T576)
- -Informed Consent for Genetic Testing (Spanish) (T826)
- 3. If not ordering electronically, complete, print, and send a Benign Hematology Test Request (T755)with the specimen.

| Specimen Type | Temperature | Time | Special Container |  |
|---------------|-------------|------|-------------------|--|
| Varies        | Varies      |      |                   |  |

#### Result Codes:
